

MAPS Global Core Balanced Portfolio

The Morgan Stanley Wealth Management MAPS (Multi-Asset Portfolio Solutions) Global Core Balanced Portfolio is an actively-managed diversified portfolio that invests in a broad range of managed funds and exchange traded funds sourced from around the world.

Who is this portfolio suitable for?

Morgan Stanley Wealth Management Australia has designed this portfolio to be suitable for investors who have a balanced risk profile and are looking for a portfolio with a mix of growth and defensive assets (see Risks section on page 5). It is suitable for investors who can withstand some fluctuation in prices but would also like some downside protection. The portfolio has a core strategic asset allocation range of 48%-72% in growth assets and 28%-52% in defensive assets.

Performance

Note: The MAPS Global Core Balanced Portfolio is based on the Global Core Balanced model published by the Morgan Stanley Wealth Management Research team. Past performance may not be indicative of future results.

The portfolio is hypothetical and does not include actual trades; results do not include transaction costs/fees. Return data from 30 September 2020 to 30 September 2021. Morningstar Category Average ("peers") is the Morningstar Australia Multisector Balanced Category Average. Performance is net of ICRs (indirect cost ratio).

Market Commentary

After eleven sequential months of outperformance, the S&P/ASX 200 index closed 1.9% (TR) lower in September at 7332 points, although YTD performance remains strong at ~15%. Resources performance was split, with Energy the best-performing sector (+16.7%), whilst Materials (-9.3%) fell the most. On the attribution front, Financials (+46bp) and Energy (+46bp) were the largest contributors to the overall returns for the month, whilst value was lost through Materials (-173bp).

September also saw negative total returns across major equity regions of around 3-5%, with Japan the only major region with a positive total return (4.3%). Energy was the only global equity sector with positive returns (9.1%). Total returns were also negative within Developed Market (DM) rates while Credit outperformed. US Investment Grade and High Yield excess returns were up 26bp and 53bp, respectively. The US dollar appreciated against major DM and Emerging Market currencies. Natural gas had a particularly strong month (+33.2%), while iron ore had the third-worst MoM performance in history (-16.4%).

US Non-farm payrolls rose 194,000 in September, following an upwardly revised 366,000 increase in August (net two month back revisions were +169,000). This marked a disappointingly low non-farm payrolls gain in September, but the report was not without some bright spots – strong wages, an increase in the average work week, some solid sector level details, and a solid household survey employment gain.

The yield on the benchmark 10-year US Treasury increased from 1.3% at the end of August to 1.5% at month-end. However, both the Bloomberg Barclays Global Aggregate (Total Return, USD) and the Bloomberg AusBond Composite (Total Return, USD) were down 1.8% and 1.5% respectively.

Investment strategy

The MAPS Global Core Balanced Portfolio draws from Morgan Stanley's leading insights and specifically aligns to the needs of investors with a balanced risk profile. It is designed to capture value at several points in the investment process; asset allocation, active-passive strategy mix, manager selection, portfolio construction and risk management. The portfolio draws from Morgan Stanley's global reach, bringing together instruments from around the world.

The portfolio seeks out the highest quality globally-listed ETFs and unlisted managed funds. It seeks to take advantage of the lower indirect cost ratios (ICRs) often available from globally listed ETFs and the fact that liquidity is typically greater than similar ASX-listed ETFs. For managed funds, we can select from a deeper pool of global talent as we try to identify the best active fund managers in the world.

Benefits

Optimised active-passive mix

Award winning research capability

Broad universe of globally-listed ETFs and managed funds

Broad diversification

Lower volatility

Active risk management

Full performance and tax reporting

Access to national presentations

Benchmark

The Investment Solutions team sets the benchmark for the MAPS Global Core Balanced Portfolio by referring to analysis generated by the Wealth Management Research team.

The portfolio has a dual benchmark. A real return benchmark (i.e. targeting a premium over inflation) with an appropriate indicative time horizon for realisation; and a relative return objective, allowing investors to measure portfolio performance against the median comparable multi-asset portfolio in Australia.

Portfolio Risk Profile	Real Return Objective	Relative Return Objective
Conservative	CPI + 2.0%	Morningstar Australia Fund Multisector Conservative Category Average
Balanced	CPI + 3.0%	Morningstar Australia Fund Multisector Balanced Category Average
Growth	CPI + 4.5%	Morningstar Australia Fund Multisector Aggressive Category Average

Risks

Investors should note that an investment in the portfolio through Morgan Stanley's Separately Managed Account (SMA) involves risk, including:

Market risk - The risk associated with factors that can influence the direction and volatility of an overall market, or security-specific risks. These factors can affect one country or a number of countries.

International investments risk - The risk arising from political and economic uncertainties, interest rate movements and differences in regulatory supervision associated with international investments.

Currency risk - Currency exchange rate fluctuation risk arising from investing across multiple countries.

Interest rate risk - The risk arising from movements in interest rates which may cause the price of securities within the portfolio to fluctuate.

Credit risk - The risk of an issuing entity defaulting on its obligation to pay interest/principal when due.

Liquidity risk - The risk that an asset may not be converted to cash in a timely manner.

Counterparty risk - The risk of another party to a transaction failing to meet its obligations.

Leverage risk - Where underlying investments contain leverage, the movement in market prices may magnify the gains or losses within the portfolio. This may result in a loss of capital.

Investors should consider the relevant product disclosure statement or offer document (where available) for other risks that may apply.

Important Information

This communication is made by Morgan Stanley Wealth Management Australia Pty Ltd ("Morgan Stanley") (ABN 19 009 145 555, AFSL 240813), a participant of ASX Group.

It contains factual information only and is not intended to reflect any recommendations or financial advice, nor is it an offer or solicitation in relation to any particular financial product. The procedures, investment ranges, benchmarks and limits specified are accurate as at the date of this document and Morgan Stanley reserves the right to vary these from time to time.

To the extent this document does contain any general advice, it has been prepared without taking into account your objectives, financial situation or needs, and because of this, you should, before acting on it, consider the appropriateness of the advice, having regard to your objectives, financial situation and needs, and if the advice relates to the acquisition of a particular financial product for which a target market determination (TMD) or an offer document (such as a prospectus or product disclosure document) is available, you should obtain the TMD and offer document relating to the particular product and consider these documents before making any decision whether to acquire the product.

Before entering into any transaction, you should ensure that you fully understand the terms of the transaction, relevant risk factors, the nature and extent of your risk of loss, as well as the legal, tax, and accounting consequences of the transaction. You should also carefully evaluate whether the transaction is appropriate for you in light of your experience, objectives, financial resources, and other relevant circumstances and whether you have the operational resources in place to monitor the associated risks and obligations over the term of the transaction. We recommend that you obtain financial as well as tax advice based on your own individual circumstances before making an investment decision. Morgan Stanley's Separately Managed Accounts platform and certain financial products and services are available in Australia solely to persons who are "wholesale clients" under s761G of the Corporations Act 2001 ("Act"). Accordingly, you are assumed to have sufficient knowledge and experience to make your own evaluation of the merits and risks of a transaction of this type and to be able to assess fully the adequacy of information provided to you. No other person may rely on the contents of this communication nor have access to any such financial products and services, and you acknowledge that as a wholesale client your rights under the Act may be reduced.
